

## Protect-IT

Let us keep your computer safe.

Our **Protect-IT** package proactively searches in the background for potential problems that can remain hidden. This alerts our technicians immediately anything is found, letting us get to work on resolving them promptly.

**Checked Continuously** - daily safety checks

**Easy Remote Access** – built-in remote support

**Always Up-To-Date** – you always have the latest/safest software versions

**Enterprise Level Protection** – automatic defence to keep you safe

**File Recovery** – automated backup solution

Once installed on a computer, our **Protect-IT** system enables us to continually watch over it, so we know as soon as anything needs attention. Three different levels of **Protect-IT** are available:

Service	Economy	Standard	Pro
Monitoring	Alerts Only	Daily Checks	Daily Checks
Patch Management	Automated	Yes	Yes
Web Protection	No	Yes	Yes
SentinelOne (PC only)	Yes	Yes	Yes
Backup & Recovery (Documents)	No	Yes	Yes
Backup & Recovery (Workstation) (PC only)	No	No	Yes
Managed Antivirus (Mac only)	No	Yes	Yes
Monthly Management Reports	No	No	Yes
Dashboard Access	No	No	Yes
Internal Remote Access	No	No	Yes

Even **Protect-IT Economy** includes our advanced Endpoint Detection and Response integrated monitoring, antivirus, anti-malware and web protection modules, and all of the checks and tasks required to keep your Windows and other software patched with the latest updates.

Your Protect-IT subscription covers one computer and additional computers may be added or removed as required and if changes are made, we will send you an updated summary of your cover
